

Tua Silver

dual function electrostimulator

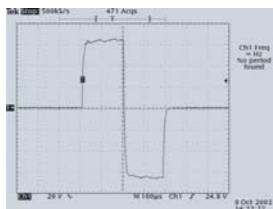

Tua Silver is an electronic device expressly conceived for induced muscular exercise centred on training, hardening and toning up the muscles of the body and the slimming of fatty areas. It works on the principle of electrostimulation, meaning electric impulses applied by means of electrodes to the skin, directly on the muscles, which contract rhythmically and perform real and true physical exercise.

Tua Silver consists of a main unit (POD) with 2 outputs that can be used independently by means of the cords provided and the gel adhesive electrodes, or else connected to the belt for wireless applications, especially practical on some areas of the body.

6 working programs

- | | |
|-------------------|---------------------|
| 1 SLIM | 4 MASS |
| 2 TONE | 5 M-STRENGTH |
| 3 LIPOCELL | 6 RELAX |

In **Tua Silver** you have found a unique partner for the total well-being of your body. Tua Silver is in fact a double electrostimulator featuring 2 independent channels. The central **POD** unit can be used independently thanks to the cords provided and to the gel adhesive electrodes which can be comfortably applied to the body, or else together with the practical **belt** which, thanks to the patented Rotofit System with water sponges, can be worn and has an immediate effect on muscles and is simply to apply...

Tua Silver features a biphas rectangular wave that is perfectly symmetrical and features on the best professional equipment to prevent any possible polarisation effect on the tissues.

Tua Silver's features

No. of outputs:	2
Wave shape:	symmetric two-phase, rectangular
Width of impulses:	150-200 µSec
No. of programs:	6
Current intensity (max):	80 mA (peak on impulse, load 1K ohm)
Frequency range:	1-80 Hz
Contraction time:	1-12 sec.
Recovery time:	1-25 sec.
Power supply:	4 batteries 1.5 V alkaline type AAA-LR03
Dimensions:	Control unit: 98 x 60 x 18 mm Belt: 98x10 cm Belt extension: 40x10 cm
Weight:	Belt with inbuilt control unit: 600 g.

Tua Silver's outfit:

- 1 electrostimulator with 2 outputs, with batteries (POD)
- 1 belt with 2 pairs of electrodes (Rotofit system)
- 1 extension
- 4 adhesive electrodes 3.5x4.5 cm
- 2 cords for electrodes
- 4 spare sponges
- 1 water sprayer
- 1 operation manual
- 1 stylish case

VuP'Esse
BODYPLANET

This product conforms to the most stringent international standards and has been entirely designed and manufactured by Vupiesse Italia, a company which has a Quality System certified by the German Institute TÜV in conformity with ISO 9001 and ISO 13485 standards.

Tua Silver & pod

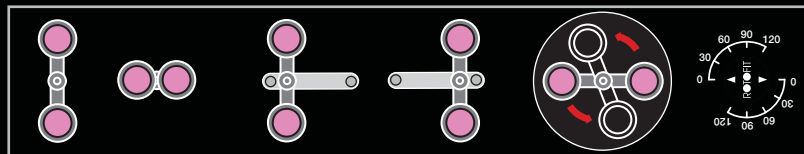

1 For fighting localized cellulite, slimming and toning the thighs.

2 For slimming, toning and flattening the tummy.

3 For firming, shaping and strongly lifting the buttocks.

ROTOFIT[®]
S Y S T E M
Worldwide patented

The simple and total mobility of the system lets you position perfectly on the various groups of muscles where it perfectly fits to different physical conformations.

Distance between the electrodes
The electrodes in each pair slide along the flexible support clip, to move them closer together or farther apart.

Sliding the electrode pairs
The electrode pairs slide back and forth on their strap, to vary the distance between them.

Rotating the electrode pairs
The sliding, distance adjustable electrode pairs can be rotated on their pivot to any angle.

Tua
SILVER

the most "original" way of embracing your body thanks to **Rotofit System**[®], a great Italian patent in the world.

...in a split second Tua Silver becomes a **handheld electrostimulator** with 2 independent outputs.

For treatments targeted to all body areas such as pectorals, biceps, triceps, dorsals, paravertebrals, etc...

2 independent outputs
