

FROWN NO MORE

With Hollywood's best kept beauty secret

Before using Frownies

After: These stunning results were achieved after using Frownies for only four weeks! More results can be expected with continued use.

WE are continually searching for ways to reverse the signs of aging and look younger without surgery or botox.

Well now you can!

Frownies are small pieces of natural kraft paper with a hypoallergenic plant-based adhesive on the back.

They have perforated lines around shapes that fit the problem areas of the face where wrinkles appear; the neck, the corners of the eyes, mouth and the forehead.

Facial expressions and stress "train" facial muscles to hold deep lines.

Over time, these deep lines become wrinkles and make us look old.

Frownies form a splint holding the visible layer of skin smooth and flat overnight while the skin cells reposition themselves to support natural, smooth, healthy-looking skin.

Frownies gently re-educate the underlying

muscles to assume their correct, relaxed and natural appearance.

This allows these deep expression lines to heal, leaving us with younger, relaxed-looking skin.

Frownies can be used to reduce unsightly lines on our face:

- frown lines
- crows feet
- laughter lines
- turkey neck

Frownies is priced at RMI28 per box (1 to 2 months supply) and is available at Sa Sa, Metrojaya Times Square, Vitacare, Healthlane, A Cut Above, Alpro Pharmacy and other leading pharmacies and retailers.
