

REVOLUTIONARY GADGET

UNLIKE ordinary slimming belts that only vibrate and massage the skin's surface area, the TUA 360° works on the advanced principle of electro-stimulation – applying electric impulses directly on one's muscles to perform real and true physical exercise.

This revolutionary form of passive gymnastics has been used for decades by hospitals, sports clinics and beauty centres for beauty and health purposes.

And now, with TUA 360°, you may enjoy professional results that previously only professionals had access to.

Applicable to virtually any part of the body, TUA 360° helps slim and tone the tummy, thighs, buttocks and back muscles that ultimately render you looking more appealing in a lesser amount of time than you imagine.

The TUA 360° can be used to tone any part of the body.

Not convinced? There was a study at the 7th International Sport Medicine Symposium Chianciano Terme (Italy) that reported users experiencing a success rate of 84.6% in improving skin and muscle tone, while reducing excess fat and cellulites with the TUA 360° (the average user lost 2.64cm on the abdomen and 3.37cm on the thighs).

Conservatively, you may expect some visible improvements after just 7 to 10 sessions of the TUA 360° with 15-20 minutes per area.

Made from special lightweight material, the TUA 360° weighs only 500g, which is much lighter from conventional slimming belts. In fact, you may not even feel it's there, with the patented Rotofit System that takes into account different body anatomy (shape, size and position), allowing accurate placement on specific muscles for maximum results.

Since there is no cumbersome wiring or need for direct power source (the TUA 360° is battery operated), you are free to use it anytime and anywhere you want, even in your car! It's 100% made and designed in Italy by a company with

30 years' experience in manufacturing beauty and health devices with compliance to international safety regulations – the European CE & German TUV.

It is globally accepted and sold in more than 29 countries worldwide. Already tried and tested by hundreds of thousands of satisfied users all over the world, the TUA 360° is a reliable solution for unshapely bodies, not to mention, poor self-esteem.

TUA 360° is priced at a special introductory price of only RM888 and is available at the following outlets:
