

Five-star treatment

Tua Viso is an advanced electronic face lift device designed to stimulate and exercise the facial muscles, giving you a younger face naturally.

CHANGES come with time whether it's to our world, our society or to our bodies; and our face is no different. As we mature, fine lines start to appear, our skin loses its elasticity causing our face to sag.

Tua Viso is an advanced electronic face-lift device designed to stimulate and exercise the facial muscles, giving you a younger face naturally.

Scientifically tested and clinically proven, Tua Viso is the perfect alternative to costly and dangerous invasive cosmetic procedures such as surgery or botox.

By exercising the facial muscles, you can lift and firm your face thus reducing wrinkles and sagginess.

Also known as the non-surgical face lift solution, Tua Viso is 100% designed and made in Italy.

It works by generating trains of sine wave pulses (specific for delicate facial muscles) to induce sustained muscular contraction.

The passage of microcurrent boosts local circulation, oxygenation, nutrition and detoxification of the tissues improves; this encourages metabolism and the formation of elastic fibres and increases muscle tone, in a harmless, rapid and selective manner.

Tua Viso is a safe, painless and effective face-lift for personal use, complying to stringent international safety standards including European Directives (CE) and US Food & Drug Administration (FDA).

Five Ways To Look Younger With Tua Viso

- Prevent and correct loss of facial

muscular and skin tone, tightening loose skins

- Prevent and reduce wrinkles, fine lines and eye bags

- Shape, firm and lift the face and neck

- Minimize excess facial fats and double chins

- Improve the nutrition of the skin to encourage detoxification, cell replacement, collagen production and better overall appearance
