

FACIAL EXERCISE

Tua Viso works like a gym session for a youthful look.

Easy method:
Experience facial exercise the painless way.

quent late nights and water retention.

I read from the mini handbook that I had to locate the “perfect points” on my face for maximum results. I followed the instructions on the handbook to get an idea of the locations of points on my face, and turned on the power by scrolling the

intensity button. The right point should be the point where you feel the strongest and most obvious contractions of your facial muscles.

Face-lift challenge

Other than eye bag problems, I have other common concerns such as droopy cheeks, double chin and some wrinkles on my forehead.

In order to reap the maximum benefits from Tua Viso, I faithfully followed a 50-minute facial gym session every day. From my research, Tua Viso is known for preventing and correcting loss of facial muscular and skin tone, tightening loose skin, reducing wrinkles and eye bags, as well as shaping and lifting the face and neck.

As explained by the dealer, Tua Viso is 100% manufactured in Italy, powered by only a 9V alkaline battery. It is safe and compliant with FDA approval, and promises high quality and proven results. The best thing is, you need not purchase any expensive creams or gels with this device.

Two weeks down the road with Tua Viso, my friends and co-workers were surprised by the results. I was told that I looked as though I have undergone the knife for face-lift or Botox injections!

☐ Priced at RM988, Tua Viso is available at Beauty Impress Office, 51-2 The Boulevard Mid Valley City, Lingkaran Syed Putra, Kuala Lumpur. Call them at 03-2287 2522 or visit <http://www.BeautyImpress.com>.

EXPENSIVE creams and gels most probably cannot effectively erase lines and lift sagging skin on the face. And, to be honest, how many of us can actually afford professional facials every day?

Quite some time ago, I discovered some interesting books from Amazon on the topic of “facial exercise”. I thought it was an interesting idea. Thus, I was delighted when I was given a review unit of Tua Viso to experience facial exercise the easy and painless way.

I was told that Tua Viso employs a very sophisticated technology, which is “electrostimulation”. In laymen’s term, electrostimulation means where electrical impulses are transmitted through electrodes when applied to the skin, on the muscles, which contract rhythmically, it performs facial exercise. Or simply, with Tua Viso, it is a gym session for the face.

Eye bag combat test

When everything was ready, I placed the device on my face and was good to combat my die-hard eye bags, which have always been my main concern, due to fre-
