

## Look Younger With Electrostimulation

Young to old, teens to mature, both men and women would like to follow in the footsteps of the ramp beauties and movie stars and look beautiful, made up and in perfect shape - always.

However growing older is inevitable. As we ages, fat moves downward, thanks to the unforgiving law of gravity. Lean muscle mass also declines. This can translate into sagging--under the arms, in the abdomen and in the buttocks area. The breasts can also droop. The face wrinkling, along with deep creases, muscle atrophy that cause sagging and eye bags also starts to show.

There are measures you can take to stave off or ease age-related changes in your face, body size and shape. To learn how to look and feel as if your body is ageless, you must first understand and anticipate the inevitable changes that come with the passing of years. And then you must take steps to turn back the clock or at least slow it down.

In the midst of the booming technology, **electrostimulation has been scientifically proven to be able to effectively help those who wish to attain a healthier and younger looking appearance naturally.** It uses technologies developed in the medical and physiotherapy fields to stimulate our sagging muscles, stimulate inch loss, renew firmness, and restore muscle strength.

Electrostimulation provide us the **non-surgical and non-invasive techniques** to achieve the ageless body and timeless face. Here are a few products that are helping men and women across to the globe to look younger and feel refreshed in a safe and painless way.

### 1. **Non-Surgical Facelift – TUA VISO**

Technically, there are 30 important facial muscles attached directly below the skins surface. As we age, these muscles become weaker and tend to drag the skin down, making it more difficult for the facial skin covering them to remain elastic. The result is facial wrinkling, along with deep creases and muscle atrophy.

TUA VISO is your solution to the problem. TUA VISO is a FDA-approved, patented, easy-to-use Facial Exerciser designed and manufactured in Italy. Using the concept of electrostimulation specially studied for the face's delicate muscle, TUA VISO causes a muscle or a group of muscles to contract. Repeated contraction and relaxation of muscles is an effective way of **retraining, strengthening, firming and toning the slack, sluggish or sagging muscles.** In 2 weeks time, we will start to notice the disappearance of laughter lines and a glowing youthful facial complexion is restored.

This facial exerciser will help **banish your wrinkles, crow's feet, forehead creases & double chins and visibly lifts, tones and tightens, making you look years younger naturally,** representing a major alternative for those who cannot or do not want a surgical face lifting. It is easy and effortless and it is not just for women.

## 2. BodyShaping Belt – TUA 360

For those who dislike exercise, the **TUA 360 BodyShaping Belt is the 21st century way of getting into shapes that suits your busy lifestyle.** Best of all, you can use it while doing your favourite activities - reading a book, meditation or watching television.

While vibrating slimming belt in the market merely massages your body, TUA 360 uses the advanced scientific technology of electrostimulation. It is a **very safe and simple procedure**, in which micro currents are applied to the muscle fibers of a treated area, stimulating them and making them work. The muscular exercise produced by electro-stimulation is particularly effective as it can be intense and selectively targeted towards individual groups of muscles and it penetrates deep into the body to exercise the muscles.

Laboratory experiments conducted on TUA 360 BodyShaping Belt in Italy have reported a **success rate of 84.6%** in improving skin and muscle tone, reducing excess fat and cellulite. Visible inch loss can be achieved after just 7 sessions! **Turn flabby, untoned arms, abdomen, thighs, calves, breasts, buttock muscles into toned, tighter muscles.**

## 3. The XFORMER

The XFORMER covers all the functions you can ask of a modern electrostimulation appliance. It features a total of **57 work programs** split up into four basic categories: **SPORT - BEAUTY – REHAB.**

The work programs have been specially designed by a team of experts and developed to obtain the very best results in every type of application. The electrical parameters contained in each program are in fact perfectly attuned with the results that each type of user wishes to obtain from the appliance.

It is a sophisticated latest-generation electronic appliance complete with programs that is powerful and especially easy to use. It is use to train and tone up your muscles and slim down, combat cellulite and relieve pain. XFORMER's special design, makes it a compact and elegant object that stands out from the crowd thanks to its truly exclusive appearance.

It also features a broad range of accessories that make it comfortable and safe to use, starting with gel and sponge electrodes, suitable for any type of application. **XFORMER is definitely the electrostimulation appliance you are waiting for, designed to look after your body every time you want.**

Correct and regular use of electricstimulation increases strength and muscle tone just after two or three weeks. **XFORMER will not only make you feel more beautiful, but will help you to discover that together with your looks, your lifestyle can also improve.**

100% made in Italy, with no harmful side effects and in conformity with the most stringent international standards, these products are for both men and women who prefer natural anti-aging technique. Their use in the home permits a regular and even enjoyable practice of workout that promises to give lasting youthfulness to the face and your body.
